

AI Chatbot Test Document

This PDF is designed to test a Retrieval-Augmented Generation (RAG) chatbot.

Company

NovaTech Solutions is a software company headquartered in Kaunas, Lithuania.

Project

Project Orion is an AI-powered document assistant that allows users to upload PDF files and ask questions about their contents.

Team

Project Manager: Sarah Johnson
Lead Developer: Mohamed Umer Zunzunia
Backend Developer: Alex Carter
UI Designer: Emily Brown

Technologies

Python, FastAPI, Streamlit, LangChain, ChromaDB, Ollama, Llama 3.2, and Docker.

Timeline

The project started on 15 January 2026 and is expected to finish on 30 September 2026.

Budget

The total budget is €125,000.

Goals

Reduce document search time by 70%, provide accurate answers from uploaded documents, and support multiple PDF uploads in future versions.

Notes

The chatbot uses Retrieval-Augmented Generation (RAG). Documents are indexed only once after upload. User questions perform similarity search on stored embeddings rather than re-indexing the document.
